

Project Report

Google Form

I created my project using Google Forms to design a Digital Literacy Awareness Quiz. The form included multiple choice and short answer questions related to digital literacy, safe internet practices, and useful digital tools. After creating the form, I shared it and collected responses from participants. From the response sheet, I was able to analyse the answers easily. The results showed that participants understood important concepts like using strong passwords and avoiding suspicious emails. I also learned how to view summaries, charts, and insights automatically generated by Google Forms, which made analysis simple and clear. This activity helped me practice creating surveys, collecting data, and analysing results. These tools will help me academically by improving my ability to conduct research, gather feedback, and present information in a structured way. One interesting thing I found was how quickly Google Forms generates visual reports. The only difficulty I faced was designing clear and balanced questions for the quiz.
